

# INOXA

Modern ball-pool ball cleaner INOXA has been made and designed to provide the maximum of cleanliness and hygiene of balls in ball pools. It substantially affects children's health. The automatic mechanism changes the process of manual pool-ball ball polishing into comfortable and efficient method. It combines three functions - bathing ball-pool balls in water, mechanical cleaning with the use of a special brush, and disinfection with antibacterial solution.

Independent biological and antibacterial tests prove that this method eliminates more than 95% of bacteria including E. coli and MRSA, as well as fungi and viruses that are present in dirty ball-pools.

**Efficiency:** max. 3 600 ball-pool balls/h. = 1 ball-pool ball/sec.

**Diameter of ball-pool balls:** 7-8 cm

**Cleaner made of:** stainless steel

**Dimensions:** 75x50x45cm / 48kg

**Water level:** min. 15L – max. 25L

**Water filling:** through the inlet

**Water outlet:** ½ inch cap

**Brush:** 10x60cm (diameter x length)

**Number of fibers:** 140 000

**Motor:** 230V/1320rpm. / 0,37kW / THERMIC

**Spiral:** INOX - stainless steel

**Desinfectant:** Concentrate - 1L GRATIS

**Mark:** CE

**Warranty:** 2 years

**Price:** 1499,00 EUR + TAX

**Delivery:** By courier on euro-pallet 80x60cm

**WARNING:** Before switching on raise the kickstand (UP) and fill the cleaner (20L water and desinfectant). Remember about supplement of liquid to the level indicated on speculum.
